## PERSONAL DETAILS:

Currently located: Ramallah.
Nationality: Palestinian.
LinkedIn: LinkedIn Profile.

## OBJECTIVE:

I am seeking to apply the concepts and techniques of information security in an organization that fosters the need for innovation and self-development. I aim to employ my understanding of networking and information security concepts to enhance security measures and implement best practices. I aspire to work in an environment that fosters creativity and encourages self-improvement, providing ample opportunities for professional growth and the continuous expansion of my knowledge and skills in the field of information security.

## EDUCATION BACKGROUND:

Bachelor's degree in Computer Networks Security and Protection from Hebron University (2019 - 2023).
Cumulative GPA 82.5.

## EXPERIENCE:

- Systems Support Engineer | Future Information Systems (June 2023 – Sep 2023)

  - Provided comprehensive technical support to the company's clientele, efficiently resolving hardware and software issues.
  - Assisted in the deployment and maintenance of company devices, ensuring optimal performance and security.
  - Training employees to improve their understanding and usage of the company's systems.

- Network Security Engineer | Jawwal (Sep 2023 – Present)

  - Monitor and mitigate Distributed Denial of Service (DDoS) attacks to ensure network stability.
  - Collaborate with the team to effectively develop our Anti-DDoS system and resolve system vulnerabilities.
  - Design and plan network security strategies to ensure robust protection against potential threats.
  - Perform regular security assessments and implement best practices to safeguard our network infrastructure.

## CERTIFICATES AND COURSES:

1. Network Essentials.
2. Linux Essentials.
3. Cyber Security Fundamentals.
4. Cyber Security Advanced (Bug hunting and DFI).
5. Network Security Expert (NSE2).
6. Windows Server 2019 Administration (ADDS)
7. Digital Forensics.

## TECHNICAL SKILLS:

1. Designing and configuring networks using GNS3 for emulation and Cisco Packet Tracer for simulation.
2. Good at using Linux distributions and the command-line interface (CLI).
3. Programming languages such as C++, PHP, Python, and bash scripting.
4. Troubleshooting computer software and hardware issues.
5. Deploying, implementing, and managing virtual environments using Proxmox, and I am familiar with ESXi.
6. Deploying, implementing, and managing pfSense firewall, and I am familiar with FortiGate.
7. Familiar with Cybersecurity practices including threat detection, vulnerability assessment, and incident response.
8. Familiar with FortiGate firewall and Kaspersky Endpoint Security.
9. Familiar with ethical hacking techniques, as well as digital forensic principles and tools.

## TRAINING:

- IT Department, Hebron Electricity: Hands-on experience in installing and managing Linux and Windows servers in a virtual environment (July 2021 - August 2021).

- Computer Center, Hebron University: Training in computer maintenance and hardware troubleshooting (January 2022 - June 2022).

- Cybersecurity Department, The Hope International Company: Online training in Cyber Security Fundamentals (April 2022 - June 2022).

- Cybersecurity Department, The Hope International Company: Online training in Cyber Security Advanced (Bug Hunting and Digital Forensics Investigations) (August 2022 - October 2022).

- IT Department, Gaza Sky Geeks: Online training focused on Windows Server 2019 administration (January 2024 - April 2024).

## LANGUAGE:

- Arabic: Native.
- English: Intermediate.

## PERSONAL SKILLS

1. Ability to work under pressure.
2. Quick self-learner.
3. Adaptable to new environments and challenges.
4. Strong teamwork skills.
5. Ambitious.
6. Responsible and dependable.
