
Ibrahim Mohammad AlJaafreh

Palestine-Hebron

Mobile: +970569642606

E-mail: ibrahim0aljaafreh@gmail.com

PERSONAL DETAILS:

Nationality: Palestinian.

LinkedIn: [LinkedIn Profile](#).

OBJECTIVE:

I am seeking to apply concepts and techniques of cybersecurity within an organization that values innovation and supports professional growth. I aim to employ my understanding of networking and cybersecurity concepts to enhance security measures and implement best practices. With experience in cybersecurity, I am motivated to contribute to a creative and dynamic work environment that promotes continuous learning and self-development, enabling me to expand my knowledge and skills in information security.

EDUCATION BACKGROUND:

Bachelor's degree in Computer Networks Security and Protection from Hebron University (2019 - 2023).

Cumulative GPA 82.5.

EXPERIENCE:

- **Systems Support Engineer** | Future Information Systems (June 2023 – Sep 2023)
 - Provided comprehensive technical support to the company's clientele, efficiently resolving hardware and software issues.
 - Assisted in the deployment and maintenance of company devices, ensuring optimal performance and security.
 - Training employees to improve their understanding and usage of the company's systems.
- **Network Security Engineer** | Jawwal (Sep 2023 – October 2024)
 - Monitor and mitigate Distributed Denial of Service (DDoS) attacks to ensure network stability using Arbor solution.
 - Collaborate with the team to effectively develop our Anti-DDoS system and resolve system vulnerabilities.
 - Design and plan network security strategies to ensure robust protection against potential threats.
 - Perform regular security assessments and implement best practices to safeguard our network infrastructure.

- **Laboratory-Technician**(Administrative & Academic) | Hebron University (October 2023 – Present)
 - Teach and deliver course materials to students, ensuring clear and effective instruction.
 - Prepare and configure the lab environment to ensure a secure and safe setup.
 - Manage and maintain computer lab equipment to ensure optimal performance.
 - Provide technical support and assistance to students and faculty during lab sessions.
 - Conducted regular maintenance checks and troubleshoot hardware, software, and network issues.
 - Assist in the development and implementation of lab policies and procedures.
 - Provide centralized server services for students and faculty.

CERTIFICATES AND COURSES:

1. **Network Essentials** | Cisco NetAcad
2. **Linux Essentials** | Cisco NetAcad
3. **Cyber Security Fundamentals** | The Hope International
4. **Cyber Security Advanced (Bug hunting and DFI)** | The Hope International
5. **Network Security Expert (NSE2)** | Fortinet
6. **Windows Server 2019 Administration (ADDS)** | Gaza Sky Geeks
7. **Digital Forensics** | Gaza Sky Geeks
8. **Cybersecurity Intermediate Training** | Gaza Sky Geeks (Ongoing)
9. **Jr Penetration Tester** | TryHackMe (Ongoing)

TECHNICAL SKILLS:

1. Designing and configuring networks using GNS3 for emulation and Cisco Packet Tracer for simulation.
2. Deploying, implementing, and managing virtual environments using Proxmox, and I am familiar with ESXi.
3. Deploying, implementing, and managing PfSense firewall, and I am familiar with FortiGate.
4. Active Directory management.
5. Network monitoring & management.
6. Digital Forensics & Incident Response.
7. Troubleshooting computer software and hardware issues.
8. Good at using Linux distributions and the command-line interface (CLI).
9. Programming languages such as C++, PHP, Python, and bash scripting.
10. Cybersecurity practices including threat detection.
11. Penetration Testing lifecycle (Cyber Kill Chain).
12. Familiar with Kaspersky Endpoint Security.
13. Familiar with SIEM Solutions.

TRAINING:

- IT Department, Hebron Electricity: Hands-on experience in installing and managing Linux and Windows servers in a virtual environment (100 hours, July 2021 - August 2021).
- Computer Center, Hebron University: Training in computer maintenance and hardware troubleshooting (100 hours, January 2022 - June 2022).
- Cybersecurity Department, The Hope International Company: Online training in Cyber Security Fundamentals (40 hours, April 2022 - June 2022).
- Cybersecurity Department, The Hope International Company: Online training in Cyber Security Advanced (Bug Hunting and Digital Forensics Investigations) (40 hours, August 2022 - October 2022).
- IT Department, Gaza Sky Geeks: Online training focused on Windows Server 2019 administration (100 hours, January 2024 - April 2024).
- IT Department, Gaza Sky Geeks: Online training focused on Digital Forensics (90hours, August 2024 – October 2024).

LANGUAGE:

- Arabic: Native.
- English: Intermediate.

PERSONAL SKILLS:

1. Ability to work under pressure.
2. Quick self-learner.
3. Adaptable to new environments and challenges.
4. Strong teamwork skills.
5. Ambitious.
6. Responsible and dependable.
